45. (New) An isolated antibody which specifically binds to a polypeptide selected from the group consisting of:

- a) a polypeptide comprising the amino acid sequence of SEQ ID NO:1, and
- b) a polypeptide comprising a naturally occurring amino acid sequence at least 90% identical to the amino acid sequence of SEQ ID NO:1, said naturally occurring amino acid sequence having 1-pyrroline-5-carboxylate reductase activity.
- 46. (New) The antibody of claim 45 which specifically binds to a polypeptide comprising the amino acid sequence of SEQ ID NO:1.
- 47. (New) The antibody of claim 45 which specifically binds to a polypeptide comprising a naturally-occurring amino acid sequence at least 90% identical to the amino acid sequence of SEQ ID NO:1, said naturally occurring amino acid sequence having 1-pyrroline-5-carboxylate reductase activity.
- 48. (New) A diagnostic test for a condition or disease associated with the expression of P5CRH in a biological sample, the method comprising:
  - a) combining the biological sample with an antibody of claim 45, under conditions suitable for the antibody to bind the polypeptide and form an antibody:polypeptide complex, and
  - b) detecting the complex, wherein the presence of the complex correlates with the presence of the polypeptide in the biological sample.
  - 49. (New) The antibody of claim 45, wherein the antibody is:
  - a) a chimeric antibody,
  - b) a single chain antibody,
  - c) a Fab fragment,
  - d) a F(ab')<sub>2</sub> fragment, or

- e) a humanized antibody.
- 50. (New) A composition comprising an antibody of claim 45 and an acceptable excipient.
- 51. (New) A method of diagnosing a condition or disease associated with the expression of P5CRH in a subject, comprising administering to said subject an effective amount of the composition of claim 50.
  - 52. (New) A composition of claim 50, wherein the antibody is labeled.
- 53. (New) A method of diagnosing a condition or disease associated with the expression of P5CRH in a subject, comprising administering to said subject an effective amount of the composition of claim 52.
- 54. (New) A method of preparing a polyclonal antibody with the specificity of the antibody of claim 45, the method comprising:
  - immunizing an animal with a polypeptide having the amino acid sequence of SEQ
    ID NO:1, or an immunogenic fragment thereof, under conditions to elicit an antibody response,
  - b) isolating antibodies from said animal, and
  - c) screening the isolated antibodies with the polypeptide, thereby identifying a polyclonal antibody which binds specifically to a polypeptide having the amino acid sequence of SEQ ID NO:1.
  - 55. (New) A polyclonal antibody produced by a method of claim 54.
- 56. (New) A composition comprising the polyclonal antibody of claim 55 and a suitable carrier.

- 57. (New) A method of making a monoclonal antibody with the specificity of the antibody of claim 45, the method comprising:
  - immunizing an animal with a polypeptide having the amino acid sequence of SEQ
    ID NO:1, or an immunogenic fragment thereof, under conditions to elicit an antibody response,
  - b) isolating antibody producing cells from the animal,
  - fusing the antibody producing cells with immortalized cells to form monoclonal antibody-producing hybridoma cells,
  - d) culturing the hybridoma cells, and
  - e) isolating from the culture monoclonal antibody which binds specifically to a polypeptide having the amino acid sequence of SEQ ID NO:1.
  - 58. (New) A monoclonal antibody produced by a method of claim 57.
- 59. (New) A composition comprising the monoclonal antibody of claim 58 and a suitable carrier.
- 60. (New) The antibody of claim 45, wherein the antibody is produced by screening a Fab expression library.
- 61. (New) The antibody of claim 45, wherein the antibody is produced by screening a recombinant immunoglobulin library.
- 62. (New) A method of detecting a polypeptide having the amino acid sequence of SEQ ID NO:1 in a sample, the method comprising:
  - incubating the antibody of claim 45 with a sample under conditions to allow specific binding of the antibody and the polypeptide, and
  - b) detecting specific binding, wherein specific binding indicates the presence of a polypeptide having the amino acid sequence of SEQ ID NO:1 in the sample.

09/912,717

63. (New) A method of purifying a polypeptide having the amino acid sequence of SEQ ID NO:1 from a sample, the method comprising:

- incubating the antibody of claim 45 with a sample under conditions to allow a) specific binding of the antibody and the polypeptide, and
- separating the antibody from the sample and obtaining the purified polypeptide b) having the amino acid sequence of SEQ ID NO:1.
